Edwin Andrés Carabali Cabezas

Software Developer - Backend & REST APIs

Cali, Colombia • +57 318 433 6334 • edwinacarabali@gmail.com • GitHub • LinkedIn

PROFILE

Systems Engineering student (7th semester) focused on backend development and REST API design. I build APIs with NestJS, TypeScript, PHP 8 (MVC), PostgreSQL and MySQL. I have worked with payment gateways, secure authentication (JWT/RBAC) and automated testing. I also have a good base in web and mobile development, Scrum and Docker. I am looking for a Junior or Internship position in Backend Development.

EDUCATION

2022 – Present

B.Sc. in Systems and Computer Engineering, Institución Universitaria Antonio José Camacho (UNIAJC) · Cali

7th semester (advanced cycle).

- Focus: Backend, Software Architecture, Relational Databases and Networks.
- Relevant courses: Databases, Computer Networks, Software Engineering, Programming.
- Expected graduation: June 2028.

SKILLS

Backend (Main Stack)	TypeScript • NestJS • PHP 8 (OOP/MVC) • Python • FastAPI • REST APIs
Databases and Cache	PostgreSQL • MySQL 8 • Redis • SQLite
DevOps, Testing and Tools	Docker • Docker Compose • Git • GitHub • Linux • Pytest • Playwright • Selenium • Jira • Scrum
Architecture and Security	Design Patterns (Singleton, Composite, Strategy, Builder, Template Method) • JWT • RBAC • Bcrypt • SHA-256
Frontend and Mobile	React 18 • React Native • Expo • Java Android • HTML5 • CSS3 • JavaScript ES6+

SOFTWARE ENGINEERING PROJECTS

May 2026 – Present

ProLink-PL - Services Platform (Backend and Architecture)

TypeScript, Node.js, NestJS, PostgreSQL

github.com/wytreep/prolink-PL

- Lead the software architecture design and the relational data model for a platform that connects service providers and clients.
- Build the main API endpoints for secure user authentication and role-based permissions.

Mar 2026 – Apr 2026

UNI-VIRTUAL - Academic Management Platform (LMS)

PHP 8 (MVC), MySQL 8, React 18, Pytest, Playwright, Jitsi API, Jira

github.com/wytreep/univirtual

- Developed a modular LMS with MVC architecture in PHP 8 and React 18, with 4 user roles (Admin, Teacher, Student, Director).
- Built a REST API with more than 21 endpoints, with HTTP Range streaming for efficient delivery of media files.
- Applied object-oriented design patterns (Singleton PDO, Template Method, Composite) and ran automated tests with Pytest, Playwright and Selenium.
- Coordinated the work with Scrum in Jira during 5 development sprints.

2026 – Present

Reity - Personal Finance Mobile App

React Native, Expo, NestJS, TypeScript, TypeORM, PostgreSQL, Redis

- Built the REST API (transactions, categories, budgets with alerts at 80% and 100%) and the mobile screens for dashboard, transactions and budgets.
- Added security: brute-force protection, account lockout, audit logs, password policy, strict CORS, and password reset with a 6-digit email OTP.
